Article III: Organization

Section 1. AMVETS shall be organized with a national headquarters located in Maryland, a department in each state, District of Columbia, United States territories, and at such other places and countries as authorized by the national convention or an intervening National Executive Committee (NEC) meeting. Local posts shall be formed within such departments, and intermediate administrative groups may be created by the National Executive Committee and department executive committees to function within their respective jurisdiction where such action is deemed advisable.

Appendix D: AMVETS Investment Policy

UNIFORM CODE OF PROCEDURE FOR THE AMVETS INVESTMENT POLICY

(Adopted Pursuant to Article VII, Section 1(a) of AMVETS National Bylaws)

INTRODUCTION

This policy is designed to provide a framework within which to manage the investments of the AMVETS National Department, and specifically the AMVETS Life Membership Fund Account. This fund must always be managed in accordance with the approved AMVETS Constitution and Bylaws. The National Executive Committee (NEC) recognizes that it is the "name fiduciary" with respect to control or management of the AMVETS investment assets. Decisions relating to the implementation of this policy reside with the NEC, through the recommendations of the National Finance Committee (NFC). The NEC may further delegate authority, within the guidance provided by this policy, to the investment managers and/or staff, as it deems appropriate. The NFC, in its discretion, may choose a consultant, separate from the managers to assist the NFC and the Staff in its monitoring function. Furthermore, the NFC may contract with any other independent parties necessary to assure full compliance with this policy and optimal performance of its investment assets as approved by the NEC.

This Investment Policy provides a structure consistent with a standard care necessary for the NEC to exercise its fiduciary responsibility in managing the funds of the organization.

In developing this policy, the NFC considered liquidity requirements, the need to diversify assets, and the financial impact (including the possibility of a significant loss) of a wide range of possible policies. Periodically, a new strategic allocation for the National Department may be created when there is a significant change in cash requirements or capital market expectations, and at least every five years. This policy will be updated to reflect these results as necessary.

INVESTMENT OBJECTIVES

The primary purpose of the investment program is to invest long-term assets in a manner that ensures sufficient resources will be available to meet immediate and long-term requirements. The funds of AMVETS National Department should be invested in a prudent and diversified manner. The overall investment objective is to maximize the total rate of return subject to the preservation of capital and meeting the required cash flows of the organization. Preservation of capital includes minimizing the risk of loss of principal for the Fund as a whole and minimizing the erosion of principal through inflation. This principle helps to provide needed working capital to advance the vision and mission of the organization as recommended by the AMVET Long Range Planning Committee and approved by the National Executive Committee (NEC).

It is understood that the Fund will be subject to market risk. However, over complete market cycles (3-5 year time period for the purposes of this policy), assets should generate a return, net of fees, greater than the designated benchmark index for the particular asset classes. These comparisons will be made at least annually. The results will be reported to the NEC upon completion.

FUND INVESTMENT POLITICS

Asset Allocation

The guidelines that the AMVETS NEC and NFC have adopted for the overall allocation of the Fund's assets are as follows:

Asset Allocation	Lower Limit	Target	Upper Limit
Large Cap Equity	0%	30%	50%
Mid Cap Equity	0%	10%	15%
Small Cap Equity	0%	05%	10%
International Equity	0%	05%	10%
Domestic Fixed Income	40%	50%	100%
Cash	Separate decision determined by the needs of the Fund		

ASSET CLASS INVESTMENT GUIDELINES

Domestic Equity:

The investment manager may invest in mutual funds where appropriate. For example, to gain proper diversification, mutual funds may be used for gaining exposure to small and mid cap stocks.

The investment manager may not invest in private placements (unless specifically allowed), direct oil, gas and mineral exploration investments, and nominally public issues for which the market is severely restricted.

All securities shall be of a class listed on a national securities exchange (NYSE, AMEX) or traded in the over-the-counter market and quoted on the National Association of Securities Dealers Automatic Quotation Service.

Industry and sector allocations should ensure prudent diversification and risk control. Investment in any issuer must be limited to 5% of the market value of the portfolio as well as 5% of the outstanding securities of any single issuer. Industry weightings should not exceed 35%.

The investment manager is prohibited from investing in letter or restricted stock, commodities, options, futures and forward contracts and/or any other derivative instrument; or from engaging in short sales, margin transactions or other specialized investment activities. No assets may be invested in securities whose issuers have filed a petition for bankruptcy.

Domestic Fixed Income

The fixed income portion of the Fund's assets shall be invested in marketable fixed income securities of the first four quality grades as established by one or more of the nationally recognized bond ratings services. The average quality of all the bond holdings should be maintained at AA or better. The following instruments are acceptable:

Money Market Mutual Funds

Commercial Paper or Variable Rate Notes rated P-1 b Moody's, A1 by Standard & Poor or F1 by Fitch.

Certificates of Deposit and Bankers Acceptances rated A or better by Moody's Investors Service or equivalent by Standard & Poor's.

Debt instrument of the U.S. Government or its Agencies (backed by the full faith and credit of the U.S. Government).

Marketable corporate debt, mortgages, and asset-backed securities rated the equivalent of BBB or better by Moody's Investors services, Standard & Poor's or Fitch Investors Services.

Other restrictions are as follows:

Portfolio duration should be + 20% of the Lehman Brothers Aggregate Bond Index benchmark duration.

The investment manager may not hold more than 5% at the market value of the portfolio in any one issuer's securities other than direct obligations of the U.S. Government or its agencies.

Unrated securities may not be purchased unless specifically allowed.

Yankee Bonds (U.S. dollar denominated debt obligations of foreign credits) may be purchased up to 10% of the portfolio.

Private Placements are explicitly prohibited with the exception of 144A securities, which can be included up to 5% of the portfolio.

The investment manager shall not use derivative securities to increase portfolio risk above the level that could be achieved in the portfolio using only traditional investment securities or to acquire exposure to changes in the value of assets or indexes that by themselves would not be purchased for the portfolio. Under no circumstances will the manager undertake a derivative investment possessing elements of leverage of that is non-covered or leveraged to the extent that it would cause portfolio duration to exceed the limits implied by the benchmark.

In addition fixed income securities whose returns are tied to another security or currency are specifically prohibited. Investment in Class B mortgage derivatives is not permitted at this time. Class B means securities whose value changes as a multiple of the underlying security. This restriction includes "Z" bonds, inverse floaters, leveraged floaters and other complex leveraged securities. IOs are specifically excluded and POs are permitted. The investment manager may not engage in short sales or margin purchases.

Foreign Equity

The Fund may also consist of international equities. International equities shall be purchased primarily through the use of mutual funds to ensure adequate diversification; however, ADRs of foreign companies traded on the New York, American or the NASDAQ markets are also permitted.

Real Estate

As real estate is introduced to the portfolio, the amount and type of exposure will be determined jointly by the organization and the investment manager.

PERFORMANCE MEASUREMENT

Domestic Equity Portfolios

Achieve a rate of return which exceeds the index/benchmark over a complete market cycle (3-5 years) on an after fee basis. Example Benchmarks: S&P 500 for Large Cap, S&P MidCap 400 Index for mid cap and Russell 2000 for Small Cap.

Domestic Fixed-Income Portfolio

Earn an average annual total return which exceeds the Lehman Brothers Aggregate Bond Index, for example, over a complete market cycle (3-5 years) annually on an after fee basis.

International Equity Portfolio

Achieve a rate of return which exceeds the Morgan Stanley EAFE Index, for example, annually over a complete market cycle (3-5 years) on an after fee basis.

Total Fund

Goal on a total return basis is to achieve a rate of return which exceeds a benchmark weighted index as follows:

S&P 500 Index	2.0%
Russell Mid-Cap Index	2.0%
Russell 2000 Index	2.0%
Morgan Stanley EAFE Index	3.0%
Lehman Bond Aggregate Bond Index	0.3%
Donohue Money Market Fund Index	0%

Prohibited Transactions

There have been questions as to the propriety of areas or lines of business, such as Tobacco stocks or securities of companies doing business with certain countries. The NEC will consider such questions as they arise and, if appropriate, will determine areas and business in which AMVETS will not invest. Furthermore, no investments will be made in the investment manager and/or consultant companies.

Structure

- 1) Should AMVETS National Department contract with a single investment manager, they shall perform as both the investment manager and consultant as provided for in this policy.
- 2) Independent investment managers will manage the assets. Should there be more than one investment manager, an investment consultant may be employed by the NEC to monitor the performance of the investment managers and perform other duties as outlined below with respect to the investment consultants.

For efficiency, the number of managers should be minimized but will be determined by such factors as total funds committed to an investment asset category; diversification, monitoring and cost considerations; and the investment style of the selected managers (e.g. value vs. growth).

Emphasis will be placed on seeking high quality investment managers. A proven style of investment that offers the best opportunity for meeting the investment objectives of this policy is a basic requirement. Characteristics of selected firms will include a clear investment strategy, proven investment record and a disciplined decision-making process. In all cases, careful analysis will be conducted to evaluate the likelihood of the organization's prior track record being maintained. To this end, and because of the

conservative nature of AMVETS, new organization or investment managers will not be considered.

- 4) Communicating matters of policy, manager research, and manager performance, manager organizational changes, and other external risk factors, to the Investment Committee on a regular basis.

Termination of Investment Manager

An investment manager and/or consultant may be terminated for any of the following:

- 1) Investment performance which is significantly less than anticipated, given the discipline employed and the risk parameters established, or unacceptable justification of poor results.
- 2) Failure to adhere to any aspect of this statement of investment policy, including communication and reporting requirements.
- 3) Significant qualitative changes to the investment management and/or consultant organizations.

AMENDMENTS

The NEC reserves the right to change this policy at its discretion.
